***Oath/Declaration***

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:  
It does not state that the person making the oath or declaration acknowledges the duty to disclose to the Office all information known to the person to be material to patentability as defined in 37 CFR 1.56.

The Oath/Declaration filed February 12, 2002 incorrectly states that applicant acknowledges the "duty to disclose information which is material to the examination of this application" (emphasis added). Applicant is required to provide an acceptable Oath/Declaration having the language cited above.

***Examiner's Amendment***

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the specification, page 7, line 21: "Figure 21" has been changed to –Figure 22--.

\*Note: applicant filed an amendment on February 12, 2002 that changed the language to read "Figures 22a-22e are perspective views...". However, there is only a single

Figure 22, not Figures 22a-22e. This Examiner's Amendment is being made to make the specification consistent with the Figures.

The following is an examiner's statement of reasons for allowance: applicant's amendments to the claims to recite a device having a substantially planar tissue contacting surface is deemed to clearly distinguish over the Edwards ('675) reference previously used to reject the claims. The prior art fails to show the particular device as recited in the claims used to perform the method steps set forth. Habib et al (6,628,990) discloses a similar device, but Habib et al fail to disclose an advancement device configured to selectively advance individual electrodes as recited in the instant application claims. Rather, Habib et al disclose the deployment of all the electrodes simultaneously. Kelly et al (6,918,907) and Daniel et al (7,008,421) disclose other devices having individually deployed electrodes. Neither of these references qualifies as prior art in view of applicants claim for priority, and neither of these references discloses the particular housing having an interior as set forth in the instant application claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Peffley whose telephone number is (571) 272-4770. The examiner can normally be reached on Mon-Fri from 6am-3pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Linda Dvorak can be reached on (571) 272-4764. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
